

Camillus: Our Very Best (OVB)

OVB (#CF0201)

In the years between the turn of the century and World War Two, Camillus Cutlery was responsible for producing what was considered one of the finest quality knife lines of the day-OVB. OVB is an acronym for "Our Very Best". These knives were elegant designs crafted of the finest materials available at the time. In addition, the best craftsmen the factory had under its roof were picked to build them. For 2002 we are resurrecting this grand old brand of knives. This time we have selected Master Bladesmith Jerry Fisk one of the worlds finest custom makers for the design and testing of the first OVB product in over sixty years, The Fisk Presentation Bowie.

This knife starts out as a billet of our premium 0170-6C Carbon steel and is mated to a hand-selected stabilized amber fiddleback maple handle. A precision fit guard and ferrule add a touch of class, and are accented by stainless steel handle bolts that are seamlessly blended like the finest handmade knife. This knife is a presentation version of Mr. Fisk's signature Bowie, the Comanchero, a timeless design that is practical for a variety of uses.

This new OVB Bowie is the perfect fixed blade addition for the serious knife collector as only five hundred of this model will be produced in 2002. The OVB Bowie will be consecutively serial numbered and also will come with a padded knife case to protect your investment. The sheath for this model is a heavy-duty brown leather slip sheath that has a removable frog for belt carry. The simple, yet practical design of the sheath is true to the classic lines of the knife.

Camillus Cutlery is extremely honored to be working with Mr. Fisk. We hope to introduce other OVB models in the future that not only showcase the beauty of traditional, natural materials but also the high quality attainable by our factory craftsmen.

OVB "Fisk" Bowie (#CF0203)

In the years between the turn of the century and World War Two, Camillus Cutlery was responsible for producing what was considered one of the finest quality knife lines of the day-OVB. OVB is an acronym for "Our Very Best". These knives were elegant designs crafted of the finest materials available at the time. In addition, the best craftsmen the factory had under its roof were picked to build them. For 2002 we are resurrecting this grand old brand of knives.

This time we have selected Master Bladesmith Jerry Fisk one of the worlds finest custom makers for the design and testing of the first OVB product in over sixty years, The Fisk Presentation Bowie. The second installment of the Fisk OVB Bowie with an Ironwood handle, is the perfect fixed blade addition for the serious knife collector as only five hundred of this model will be produced in 2002. This knife is a presentation version of Mr. Fisk's signature midsize Bowie, the Comanchero, a timeless design that is practical for a variety of uses.

This knife starts out as a billet of our premium 0170-6C Carbon steel and is mated to a hand-selected stabilized desert ironwood handle. A precision fit guard and ferrule add a touch of class, and are accented by stainless steel handle bolts that are seamlessly blended like just the finest handmade knife. The Ironwood OVB Bowies will be consecutively serial numbered and also will come with a padded knife case to protect your investment. The sheath for this model is a heavy-duty brown leather slip sheath that has a removable frog for belt carry.

The simple, yet practical design of the sheath is true to the classic lines of the knife. Camillus Cutlery is extremely honored to be working with Mr. Fisk. We hope to introduce other OVB models in the near future that not only showcase the beauty of traditional, natural materials but also the high quality attainable by our factory craftsmen.
